resistant**

You'll miss nothing with Uni-Vu3

Sealed to IP 65 standard, Uni-Vu3 is an ultra compact LCD monitor suitable for use in 'real world' conditions. The unique "AUTO-OFF" feature monitors the presence of video, cutting power when loss is detected; ideal when de-powering a camera. Supplied with clamped "Mini-DV" battery mount (expect about 24H duration on 6600mAH battery!), 'Vu3 offers high contrast & brightness pictures. Switched mirroring of X and/or Y is of particular interest to Cinematographers using Prime Lenses.

**Complimentary
sunshade is
included**

Outline Specification

- * 16:9 native, 4:3 switchable.
- * Negligible picture cut-off.
- * 330 x 234 pixel image.
- * Contrast >350:1
